

1.3 The formal description of a DFA M is $(\{q_1, q_2, q_3, q_4, q_5\}, \{u, d\}, \delta, q_3, \{q_3\})$ where δ is given by the following table. Give the state diagram of this machine.

	u	d
q_1	q_1	q_2
q_2	q_1	q_3
q_3	q_2	q_4
q_4	q_3	q_5
q_5	q_4	q_5

Solution.

1.6 Give state diagrams of DFAs recognizing the following languages. In all parts, the alphabet is $\{0, 1\}$

(a) $\{w \mid w \text{ begins with a 1 and ends with a 0}\}$

Solution.

(c) $\{w \mid w \text{ contains the sub-string 0101 (i.e., } w = x0101y \text{ for some } x \text{ and } y)\}$

Solution.

(h) $\{w \mid w \text{ is any string except } 11 \text{ and } 111\}$

Solution.

1.7 Give state diagrams of NFAs with the specified number of states recognizing each of the following languages. In all parts, the alphabet is $\{0, 1\}$.

(b) The language of Exercise 1.6c with five states

Solution.
